

# *Your Event.* YOUR IMPACT.

No matter where you are in the world or what stage you are at in your sustainability journey, Marriott is dedicated to supporting your efforts. Marriott provides responsible meeting and event solutions designed to make a positive impact. These solutions include sustainability impact metrics that are tailored specifically for your event, helping you achieve your sustainability goals with ease.

You can receive a complimentary Meeting Impact Report from your hotel partner at any point during your event. This report offers details on carbon and water usage, food waste management, and other sustainability initiatives undertaken by our hotels.

As part of the Connect Responsibly program, Marriott takes its offerings a step further by providing access to voluntary carbon offset projects.

## How It Works:

Book your event at a Marriott hotel and opt in to receive a meeting impact report and optional voluntary carbon offset information.

Partner with the hotel team to review your sustainability needs and learn about hotel initiatives.

A draft Meeting Impact Report is available to you at any time starting with the Sales Phase.

At the conclusion of your event, the hotel will provide a completed Meeting Impact Report and information on voluntary carbon offsets if requested.
